

South Shropshire Furniture Scheme runs a computer refurbishing/recycling project. This means that computers that are less than six years old can be refurbished for use in the community or recycled for raw materials.

## Refurbished Computers

Old computers are stripped and security cleaned, then rebuilt to a high standard. These computers are then passed on at low cost to people on low incomes. This enables people who are training to practice at home - helping with educational study work.

All systems are tested for hardware and software capabilities. **The computers are not supplied with software when delivered.**

We also accept enquiries from the general public interested in owning a refurbished computer from the South Shropshire Furniture Scheme.

## Recycled Computers

Damaged computer parts or non-functional equipment such as circuit boards and disc drives are recycled to obtain their raw materials. This process reduces the waste going to landfill sites therefore helping the environment.

## Collections & Deliveries

We provide a collection and delivery service to the Bridgnorth, Oswestry, North Shropshire and Shrewsbury Furniture Schemes, who are our SHOFUR members. This enables people to donate unwanted computer systems to their local Furniture Scheme, allowing us to collect from one single point. Deliveries of ordered computers can be made in conjunction with collections.

## Accredited Training

Our computer recycling project provides Open College Network Accredited training.

The training gives the learner a basic computer refurbishing and dismantling competence, and includes training in the safe use of equipment, identifying and using a range of tools and equipment and in preparation and planning. Enabling learners to complete work to a high standard.

## The Next Step

We will work in partnership with SCAT and the Careers Service who advise on the next step for those who wish to build on the training and experience they have gained from our workshop.

## Funding

Our computer recycling project has been funded by Biffaward & Shropshire County Council. We work in partnership with SHOFUR

For further information or if you wish to donate or request a computer contact the Project Manager Christopher Breakwell
